2011 – TECHNICAL BULLETIN #11.02

MIDGETS

INFORMATION

TITLE: RPM PROCEDURE NATIONAL MIDGET COMPETITION

RPM limits

- Fontana 174 ci (8800rpm)
- Push rod 166ci (8700)
- Single overhead cam 161ci (9800rpm)
- Please refer to rules for RPM violations
- No cost to competitor
- No auxiliary items installed for exception of engines using magnetos, RPM control box and wires will be provided. (fail safe unit)
- Programmable ignition systems are encouraged to arrive with mandated RPM installed, if you need assistance we will have necessary equipment.
- USAC will only access RPM functions, EFI produced a program at our request to insure RPM only function on X1I, we will use all other ignition manufacturers tools on their units. MSD and Electromotive are working on tools that incorporate RPM only functions.
- I want to insure all we are aware of sensitivity and privacy regarding electronics. USAC official will be only person viewing data.
