APPENDIX D
2020 Dirt National & Western Midgets Division Technical Specifications

401 Design and Construction
All phases of design and construction are subject to the approval of the Technical Director. The Chief Steward and the Technical Director may exclude any car, design or construction, which they deem unsafe or not meeting the specifications, the spirit and/or the intentions of the rules contained herein.

402 Dimensions and Weight
A. The wheelbase must be at least 66 inches and no more than 76 inches.
B. The overall width will be a maximum of 65 inches.
C. The right front tire cannot be farther out than the right rear tire when the right rear wheel is set at maximum width. (as measured straight line along outside RR to outside RF)
D. All cars must weigh a minimum of 1,035 pounds including driver.
E. Additional bolt on weight must be mounted and fastened to the frame and/or chassis in a secure manner. Weight must be mounted in an area between bottom frame rails, front and rear axles and no higher than mid rails at cockpit. All weight must be mounted within confines of frame. NO BALLAST/WEIGHT IN NERFS, BUMPERS, FRONT AXLE.

403 Car Construction and Body
A. All cars shall be rear drive only. Engine offset is limited to a maximum of one (1) inch, (two inches overall), from the chassis centerline as measured at the centerline of the crankshaft. Engine inclination is limited to forty-five degrees from vertical as measured from the vertical centerline of the cylinder bore.
B. Only torque tube type drivelines, utilizing only one u-joint, will be allowed. The torque tube must be bolted directly to the face of the rear axle center section without any interruptions; the torque tube must be one solid piece. Torque tube hoop and/or strap highly recommended. A driveline containment system utilizing steel shield bolted to engine plate or containment blanket to cover torque ball and u-joint is highly recommended.
C. Radius rods may not be attached within the confines of the cockpit. All radius rods must be one piece, no spring rods or shock dampers.
D. The driver shall be seated directly behind the engine; centerline of top of seat at the drivers helmet can be no more than one (1") inch off centerline of roll cage.
E. Only standard type Midget Car bodies, tail tanks and hoods will be permitted.
F. The front part of the body, known as the nose assembly, shall not be wider than the parallel lines of the body and may not exceed the width of the frame. The nose assembly may not extend forward beyond the confines of the front bumper. (see 406 for bumper rule)
G. Any item added to resemble imitate and/or specifically designed to deflect, trap and/or form a pattern for air to travel in a directed manner, except for those used to cool and/or protect engine and brake system will not be permitted.
H. The engine must be covered with a cowling or hood secured in place. The hood or cowling need not enclose the sides of the engine.
I. A forward facing scoop, or ducting, supplying “forced air induction” to the injection inlets is not permitted.
J. Side panels covering the sides of the engine and/or vertical spill plates may not extend vertically past tubing
K. Any Wicker or turnout may not extend past the frame rail vertical of downtubes or cage, rearward of back of cage, or below bottom of lower frame rails.
L. Right side cockpit body panels may be a maximum of thirty-six (36) inches high as measured from the bottom frame tube. Opening must be 150 square inches and not distract drivers vision determined by chief steward.
M. Left side cockpit body panels may be a maximum of (36) inches high as measured from the bottom frame tube. Opening must be 150 square inches and not distract drivers vision determined by chief steward.
N. Side visors on roll cage will be limited to eight (8) inches tall. Visors that restrict driver’s vision at the discretion of USAC officials will not be permitted.
O. Only steel, aluminum, or carbon fiber floor/belly pan are permitted. The floor/belly pan may not extend rearward past the leading edge of the rear axle and must be flat from side to side without any aerodynamic aids. Horizontal panels may not extend below the plane of the floor/belly or fuel tank.

P. Sun visors must not extend forward more than seven (7) inches from the front of the forward most edge of the roll cage/halo tube, and may not be wider than the width of the cage; sun visors must be flat on both sides. For fan recognition, all teams are encouraged to place the drivers’ name on their visors in large letters.

Q. Panels attached to nerf bars will not be permitted.

R. An effective firewall must be installed between the engine compartment and the cockpit. It must be as leak proof as practical.

S. The motor plate may not be made from carbon fiber, or any type composite materials.

T. Airfoils, wings, spoilers or other aerodynamic appendages will not be permitted. The Chief Steward or Technical Director may have any panel or part removed which in their opinion is not within the spirit or intent of this rule.

U. All paneling must not extend past edge of frame rails more than thickness of material.

V. One (1") inch turnout allowed on all body and sail panel edges, except sun visor.

W. With the exception of suspension components, induction and/or exhaust systems and nerf bars, no accessory or component of the car may extend more than 6 inches from the main frame tubes. Cylindrical oil tanks mounted outside the frame, behind the engine must be mounted as close to the frame as practical.

X. Rear view mirrors are not permitted.

404 Roll Cage and Chassis
   A. Frame and/or chassis must be constructed of 4130 normalized tubing or equivalent.
   B. All cars must have a roll cage that is integral with the frame and does not encroach upon an imaginary cylinder, 20 inches in diameter, extending through the top cockpit opening directly above the seat. The roll cage should extend four inches above the driver’s helmet when seated in the driving position.
   C. Roll Cage Construction cars constructed after 1/1/98, main uprights forming the roll cage must be a minimum of 1-3/8 inches O.D. x .095 wall thickness 4130 normalized tubing or equivalent.
   D. No water or oil coolers are to be placed above or beside the cockpit opening.

405 Fuel System
   A. A conventional tail tank, fuel cell and the fuel contained must be carried on the centerline of the chassis and be located behind the driver. All cars must be equipped with a fuel cell and tail tank meeting the requirements of USAC and SFI Specifications 28.2
   B. The minimum capacity of the tank must be 18 U.S. gallons.
   C. All tanks must have a minimum of four mounts to the chassis.
   D. Fuel tanks may not be mounted to the chassis utilizing any portion of the access plates or the nut plates bonded into the fuel bladder.
   E. The engine must be equipped with a fuel shut-off device located within easy reach of the driver.

406 Bumpers/Nerf Bars
   A. The car must be equipped with a rear bumper at all times.
   B. Front and rear bumpers, and nerf bars must be constructed of magnetic and or stainless steel (NO TITANIUM) tubing with a minimum O.D. of 7/8 inch and having a minimum wall thickness of .065 inch and a maximum wall thickness of .120 inch. A maximum of three horizontal and/or three vertical tubes are allowed in the construction of nerf bars.
   C. All cars must have a tubular front bumper extending forward no more than 21 inches from the leading edge of the front axle. Bumpers must be constructed so as not to cause a safety hazard.
   D. The right nerf bar cannot extend beyond the outside of the right rear tire.
   E. With the exception of the exhaust system, no components or accessories may be attached to the nerf bar assembly.

408 Steering and Suspension
   A. Removable steering wheels incorporating a quick release mechanism conforming to SFI Specification 42.1 are mandatory. Pip pin type mechanisms are not allowed.
B. Welded aluminum or titanium suspension parts are prohibited exception of jacob's ladder (Watts link)
C. Drag link straps are required.
D. No electronic weight, shock, sway bar or any suspension item adjuster.
E. No independent suspension
F. Wheel cover fasteners be made of steel is highly recommended

409 Axles
A. The car's axles connecting the wheels must be of one-piece tubular construction without the capability of camber or independent castor adjustment to the wheel assembly. Offset kingpin bushings are allowed on front axle.
B. Any other construction will be considered as independent suspension.
C. All front axles must be constructed of SAE 4130 steel or a steel alloy equivalent in structural strength. Titanium front or rear axles are not permitted.

410 Wheels
A. The number of allowable wheels is restricted to two (2) front wheels and two (2) rear wheels on each car.
B. The wheel diameter must be 13 inches.
C. The wheel width is limited to eight (8) inches for both front wheels and the left rear.
D. The right rear wheel may be a maximum of ten (10) inches in width.
E. A USAC approved tire bead locking device must be used on the outer bead seat of the right rear tire and wheel assembly.
F. All wheels are subject to the approval of the United States Auto Club. Manufacturers are required to submit a certified test report, from an independent testing laboratory approved by USAC, showing dynamic radial fatigue, dynamic cornering fatigue and hydrostatic burst tests. All tests must meet or exceed USAC specifications.
G. The use of full-face brake scoops and/or wheel covers on the inside of wheels is not allowed.
H. All bolts are mandatory in bead lock and wheel centers.
I. Digital bleeders are allowed. Air may not be introduced to the tire. Bleeders may not be controlled remotely.
J. Any wheel cover dislodging under racing conditions will be subject to a fine. No specifications will be mandatory as to how wheel covers are attached unless track rules dictate otherwise.

411 Tires
A. Any device(s) used for warming the tires prior to competition is prohibited.

B. Any solvents or chemicals applied in any way to a tire that alter the chemical makeup of the compound or have the effect of altering tire durometer or construction is prohibited. Any tire can be confiscated at any time. Penalties from tire found to deviate from the original factory benchmark specifications are as follows:
   - First Offense-Entrant/Driver 6 race suspension, loss of points and forfeit purse for that event, $2500.00 fine.
   - Second Offense-Entrant/Driver 1 year suspension, loss of points and forfeit purse for that event, $10,000.00 fine
C. Tire Protest is $500.00 fee to be paid to competition director before event. If tire sample is found illegal, protest fee is returned. If tire sample is found legal, the protested entrant will receive a new tire replacement.

D. National Midget Tires (LF- D12, D15) (RF-D12, D15, D20) (LR-D12, D20) (RR-SP2, SP3)

412 Throttle
A. A minimum of two (2) return springs.
B. If the throttle actuating mechanism is the cable type, the cable must be encased.
413 Brakes
A. No electronic controlled brake bias adjuster. (Manual adjustment only)
B. Master cylinders not fixed to the frame must have flexible lines.
C. Carbon fiber or carbon composite brake discs or components are not allowed.
D. If at any time during competition it becomes evident that a car is without brakes, the necessary repairs must be completed before the car can continue in competition.

414 Engine Size Limits All Divisions / RPM Limits for National Midget Events

A. Pushrod Type Engines
1. Four cylinder in-line, two valves per cylinder, water cooled, with intake and exhaust ports on the same side of the head using an aluminum block and approved non-cross flow aluminum “Fontana” cylinder head.
   - Maximum of 174 CID (2852cc)
   - Maximum RPM 8800
2. Fontana (Rhino) sealed spec engine
   - Maximum of 200 CID (3278cc)
   - Maximum RPM (factory set and sealed) 7800
3. Four cylinder in-line, two valves per cylinder, water cooled, utilizing an aluminum block and/or head.
   - Maximum 166 CID (2721 cc)
   - Maximum RPM 8700

B. Single Overhead Camshaft Type Engines
1. Four cylinder in line, aluminum block and head, 2 valves per cylinder.
   - Maximum 161 CID (2639cc)
   - Maximum RPM 10300 (Esslinger)
   - Maximum RPM 9800 (Esslinger BB7)
   - Maximum RPM 9800 (MOPAR – SR-11)
2. Esslinger EST sealed spec engine
   - Maximum 161 CID (2639cc) engine.
   - Maximum RPM (factory set and sealed) 9400

C. Double Overhead Camshaft Type Engines
1. Honda K-Series four cylinder in-line, water-cooled, four valves per cylinder, must use Honda OEM cylinder block and cylinder head.
   - Maximum 154.6 CID (2533.5cc)
   - Maximum RPM 9400
   - Maximum Stroke 99 mm (3.898”)

D. The preceding engine sizes are the maximum permitted. No clean up allowed.

E. All engines must be normally aspirated, internal combustion, four cycle, reciprocating piston type, incorporating a maximum of four (4) cylinders. Only one spark plug per cylinder will be allowed. Camshaft timing must be fixed. Any device used to alter camshaft timing during engine operation is prohibited. Severe penalties will be issued to the entrant and engine builder if such devises are found.

F. The entire engine lubricating system must be of the dry sump type.
G. The use of starters and a de-clutching device is optional. If utilized they must have a neutral position in the final drive.

H. Complete engines and/or major components must be available in a reasonably sufficient supply to all competitors at comparative prices.

I. USAC reserves the right to adjust rules or disallow any engine for competition, which in its judgment does not meet the spirit and intent of competitive racing, in regards to cost and/or performance. Any engines not covered by the preceding specifications must be submitted for approval prior to entering a competition.

J. Fontana (Rhino) and Esslinger EST sealed spec engines must be rebuilt and sealed by original manufacturer. Fontana and Esslinger must supply USAC with seal and engine numbers that will be available for view to any USAC member. Any engine seal number not matching USAC records cannot participate. Any seals that have been tampered with (not original) could result in disqualification, loss of points and money earned for event. Sealed engines that are found to be out of manufacturer’s specifications penalties to entrant and manufacturer (engine builder) will be issued. Loss of all points earned, one (1) year suspension and fine, engine manufacturer fine and engine removed from list of USAC approved for use.

K. All probationary RPM limits will be monitored at each event and are subject to RPM adjustments on but not limited to an event by event basis and may be adjusted during an event.

L. Cylinder heads may not be billet. Any new design must be submitted to USAC for approval.

415 Fuel
A. Pure Methanol is the only approved fuel. (NO ADDITIVES)
B. All fuel is subject to testing at any time. Any fuel that does not conform to the USAC standards, as administered at the track, will be considered illegal. The use of illegal fuel could result in disqualification from the event and/or the entire program.

416 Exhaust
A. Exhaust system tail pipe(s) must not be any wider than nerf bar
B. The car may be required to have a muffler if local conditions warrant. If so, this will be stated on each individual entry blank. The technical director may disallow a muffler that in their opinion is not within the spirit or intent of this rule.

417 Ignition and Electronic Equipment
A. All cars must be equipped with ignition switch or emergency shut-off located within easy reach of the driver.
B. Electronically controlled fuel injection systems are not permitted. Exception is Esslinger EST sealed spec engine.
C. Any ignition, other than magneto, must be approved by USAC prior to their use in competition. It is the responsibility of the participant, not the manufacturer, to obtain proper approval.

Current list of approved electronic ignitions for national events:
- MSD programmable 6214, EFI R1i (Red or gold) Electromotive, Magnetos, Electromotive on Esslinger EST.

D. All Ignition units must have download cable on LH cockpit side attached to mid-rail by seat or front cage upright. Electromotive, magnetos and sealed Rhino excluded

E. Electronics that provide traction control are prohibited. All electronic components may be inspected, sealed or confiscated by USAC at any time. The maximum penalty for utilizing traction control is a one year suspension from competition and loss of all points earned for the season.

F. Electronic ignition systems may only be used to control and collect data for ignition; coil(s), trigger(s), spark curve(s), battery voltage, and maximum RPM limits. The electromotive ECU unit on Esslinger EST sealed spec engine in addition to above is permitted to control EFI (electronic fuel injection) with following sensors. TPS, fuel pressure, and MAP sensor.

G. The use of electronic logic processors of any type to control any function of the race car and/or any system for gathering continuous data from any function of the race car is strictly prohibited for exception of ignition.

H. Tachometer is the only item approved for use to collect/record data other than electronic ignition system.
I. RPM limitation will be mandatory at all national events. Ignition to all cylinders must be cut at or before the predetermined limit as established in section 414.

418 Safety Equipment
It shall be the responsibility of the Technical Committee to inspect all safety equipment prior to each event. Any participant not complying in full with all safety requirements in this Rule Book will not be permitted to compete.
A. Approved aluminum and composite seats may be used, no fiberglass. Seats must be mounted with minimum of 4 bolts 5/16 diameter. Seats must be installed and used in accordance with manufacturer’s instructions. Approved full containment seats are required.

B. It is mandatory that all cars have a headrest of high impact, shock-absorbing material meeting SFI Specification 45.2 behind the driver’s head with a minimum thickness of one (1) inch.

C. Seat belts must meet SFI 16.5 or SFI 16.1, be within manufacturer expiration label. (must have label) Seat belts must be installed and used in accordance with manufacturer’s instructions.

D. Helmets - All participating drivers must wear safety helmets designed specifically for auto racing that meet or exceeds the SA 2005 or SA 2010 Snell Foundation or SFI Foundation 31.1 Specifications and are labeled as such. Helmets will be subject to inspection at each event by the Technical and/or medical representative.

E. Uniforms - All drivers must wear fire resistant underwear, socks, shoes, gloves and a one-piece uniform fitted snugly around the neck, wrists and ankles. It is recommended that you also wear a fire resistant head sock and/or helmet skirt. Recommended all above items meet SFI Foundation Specifications 3.2A and 3.3

F. Arm Restraints - Arm restraints are mandatory and must be worn at all times during competition.

G. Roll cage nets will not be required if USAC approved full containment seats are utilized.

H. Roll Cage Padding conforming to SFI specification 45.1 is Highly recommended with full containment seat.

I. A SFI approved head and neck restraint system is highly recommended.

J. One way radio mandatory, (Racing Electronics Switchr, SoloII, or SoloIII- Frequency 464.5500) two way radio communication will not be allowed.

H. Wi-Fi, cellular, or satellite device( including cell phones and smart watches) in or attached to the race vehicle or the driver will not be permitted.

G. All forms of vehicle position system (GPS) will not be permitted.

419  Car / Driver appearance

A. USAC series logo must be placed on top section of sail panel right and left side for point funds and contingencies. USAC sponsor logo(s) must be placed on right and left lower cockpit side panels to be eligible for point fund and contingency programs.

B. Car numbers must be displayed in three (3) areas one (1) each side of tail and one (1) on front section of hood.

C. Drivers uniforms must display USAC logo on upper RH or LH chest to be eligible for point fund.
All entries in the race, including post entries, are eligible to participate in a single drawing for qualifying order. The designated time for the draw will be posted at the track (USAC vehicle) if participant fails to draw within designated time USAC will draw for them. YOU MAY ONLY DRAW FOR ONE (1) ENTRY PER DRIVER

At certain events, cars might qualify in groups using the fastest timed lap in a predetermined period as the official qualifying time.

1402 Qualification Procedures

All qualifications will be held in accordance with PART VIII in the current USAC Rule Book and the Official Entry for the event with the following additions and exceptions.

1. Any car not able to qualify within three positions of its original position in the qualification draw order may line up at the end of the qualifying order with the loss of one lap from the qualification attempt and can start no better than top 50% of A-feature. Car still gets qualifying time with no penalty other than starting position for A-feature.

2. Any car that has not completed their qualification attempt will have 60 seconds from the completion of qualifications to present the car to be qualified with the loss of one lap from the qualification attempt and can start no better than top 50% of A-feature. Car still gets qualifying time with no penalty other than starting position for A-feature.

3. In the event of a tie, the tie breaker will be competitor with the second fastest time.

4. Any replacement(s) or alternate(s) necessary to complete the starting field for a race will be based upon the posted results of the qualifying race(s) and/or the fastest official qualification time, or by draw order if no times are posted, and will be lined up at the rear of the starting field.

5. When the field of cars is insufficient to comprise a complete program, a car unable to qualify will be able to start last in the first available event. If more than one such car qualifies for the feature, these cars will be placed at the rear of the field in the order of their qualifying draw.

6. The Chief Steward is empowered to change the event format, including the number of laps run, as set forth in the Official Entry when unusual circumstances arise that demand this action.

7. All cars, unless noted in driver’s meeting will go directly to scales post qualifying. If car misses scale and returns to their pit or car found to be light, will be scored last position. Exculating circumstances will be considered.

8. Split qualifying will not be used for any event no matter what the car count. Positions 7-10 in feature lineup are filled by Heat race winners in order of Heat races. If a car in the top 6 Feature invert wins a heat race, the available spots 7-10 are filled by qualification order of cars qualified for Feature event.

1403 Drawing for Starting Positions

In the event qualifications cannot be held or completed, the starting positions shall be determined by a random draw to determine the starting order of the heat races. The specifics of the random draw are outlined in Part VIII, 8.9.

The Chief Steward has the authority to select and/or amend these procedures in unique situations.

1404 Provisional Starting Positions

The National and Western Midget Divisions will include a maximum of two (2) provisional starters in each feature event providing there are eligible entrants who accept this option.

The following conditions apply to provisional starters:

1. The top 20 in National Entrant points are eligible for a maximum of three (3) provisional starts, the top 20 in Western Dirt Entrant points are eligible for a maximum of two (2) provisional starts per season with the top Entrant in points, not qualifying for the feature, being the first recipient. If an eligible Entrant elects not to use a provisional, his/her position will be taken by the next highest in point standings. No guaranteed start money if provisional used.

2. First event for 2020: “Provisional” will be based on 2019 season ending top 20 car owner points.

3. All events up to May 1, will be based on previous season ending top 20 car owner points and the top 20 in current 2020 car owner points. The first (2) from either category will be eligible. 2020 points take precedence.

4. After May 1, current top 20 car owner points will be used for provisionals.
5. Starting positions, point allocations and additional eligibility requirements can be found in 5.4C, 5.10 and 9.10C.

1405 Stopping on the Course
1. A car that stops for any reason after leaving the grid and impedes the start of the race will be placed at the rear of the starting field, exception is safety issue.

1406 Laps under Yellow Flag
1. In events of 60 laps or less, laps where the yellow flag is displayed will not be scored.
2. Cars stopped on the course and restarted will be placed at the rear of the field.
3. If the yellow flag is displayed before the field completes the first lap, a complete, and two abreast restart will be made with the exception that any cars not completing the first lap, or stopping, will be placed at the rear of the field. If more than one (1) car in either lane cannot make original line up, USAC will use crisscross procedure to establish new line up.
4. If the field completes the first lap under green, the first lap shall be scored. Any subsequent yellow flags will result in a single file restart lineup. This lineup will be determined by the last completed lap scored under the green flag.
5. Any car not completing the lap in which the yellow was first displayed, shall be considered involved in the incident and placed at the rear of the field.
6. If an incident occurs on the first lap where the yellow is displayed, and after running laps under yellow it becomes necessary to display the red flag, the restart lineup will be based on the yellow flag procedure and cars involved must start at the rear of the field.
7. A car unable to start a race that is later red flagged can enter the restart lineup at the rear of the field.
8. During a caution period a car may be called into the "designated pit area", using the Black Flag, for inspection by the Officials. If the car is determined to be safe to resume racing, and no work of any kind is performed, it may return to its previous position
9. Inadvertent yellow: A car that an inadvertent yellow is displayed for will be positioned in order of positions lost. Example: USAC throws a yellow for a car that appears to spin but does not; the car continues and loses 2 positions in process. The car that the inadvertent yellow was thrown for would line up for the restart behind the 2 cars that passed them.
10. A lap is scored complete when any two cars pass under green conditions. All cars crossing under green are scored in that position with the balance of the field reverting to the running order on the previously completed lap.
11. All Feature events will be Green-White-Checkered finish if caution is displayed after the white flag.

1407 Yellow Flag Work Procedure National Events
1. If you leave the racing surface to perform any repair you will have 60 seconds to complete the repairs. Each car will only get to use the 60 second rule one time and this will only be allowed during the feature, there will be no time given during preliminary races.
2. The 60 second clock will start when the track is clear and the line-up is good and the car is stopped in the work area.
3. With 5 laps or less remaining in the feature, no work area time is guaranteed.

1408 Red Flag Procedure
1. Red flags will be opened up at the discretion of the Chief Steward. The white flag will be displayed, signaling to the crews that they may go out to the cars. Specifics of a red flag procedure will be given by the Chief Steward at the Drivers Meeting.
2. Drivers are to remain buckled in during red flags, unless otherwise instructed by a USAC official. Drivers will also be allowed to remain buckled in while refueling, with the engine off.
3. Any car that leaves the racing surface under red flag will be positioned at rear of field.

1409 Hazardous Mechanical Conditions
All cars must have nerf bars, rear bumper, hood and air cleaners (if exposed) in order to start or continue in a competition. Competitors must start the event with these items but, may continue without nerf bars during the event if damaged.
1410 Repositioning

1. Any driver who improves his or her position during a start or restart by passing other cars before a designated point on the track shall be guilty of a violation. The penalty will be a repositioning of the car rearward two positions for each car passed. This penalty will be assessed at the next yellow caution period, if possible, or in the Official Finish of the race. Designated point will be specified at drivers meeting.

2. Any driver who does not maintain a nose to tail formation until past the designated point on the track during any start will be repositioned rearward 1 (one) position. *Extenuating circumstances will be considered.*

3. If more than one car in either inside or outside lane cannot make original lineup or is involved in caution, the lineup will be criss-crossed throughout.

1411 Backup Cars

Teams may use a backup car any time between qualifying and the start of the A-Main. Use of backup car must be approved by Technical director. If a backup car is introduced before qualifications and makes original drawn position in qualifying order there is no penalty. If qualification spot is missed or you have remaining lap(s) you can qualify at the end under normal penalty of not being able to start feature in top 50% of field. If a backup car is introduced any time after original entry is qualified, the replacement car will start at the rear of next scheduled event qualified for. A backup car does not have to be part of a team’s original equipment however the backup car cannot have already been entered in the event. Once a car has been withdrawn from an event, that car will not be allowed to be re-entered to competition during that event. The replacement car will be credited for points earned as the original entry.

1412 Event Procedures National Events

1. In the event the race track needs to be run in (wheel pack) it is mandatory that all cars participate. All cars remain on the track until the checkered flag, group one (1) will remain on the track for hot lap session. Any car that leaves track before checker flag displayed will be subject to penalty of loss of one (1) lap in qualifying. Specifics will be addressed at drivers meeting.

2. If you are not on the track or in push off lane, ready to race at announced time during drivers meeting you will be penalized two (2) starting positions. Any car pushed after field started assembling must start at rear. *Extenuating circumstances will be considered.*

3. All National events start at designated area in turn four (4), original starts side by side you cannot improve your position until past designated starting point. Restarts single file nose to tail in line; you cannot improve your position until past designated area. Refer to 1410 repositioning for penalty.

4. All National Feature events will use (45) minute rule, regarding a necessary stoppage for fuel. Time starts at first engine start. Clock will stop during red flag condition and continue at first engine start.

5. All standard format events will feature 6-car invert in each heat with the six fastest heat transfers inverted at the front of the feature field. Behind those, heat winners line up in order by qualifying seed (unless already among top-six invert), followed by the balance of the field straight up by qualifying seed.

6. Cars may be weighed prior to and/or following any event, you will be notified at drivers meeting of any change to scaling process. The scales will be available to all before hot laps.

7. If car found to be light that car will be scored last, awarded last place points and money. *Extenuating circumstances will be considered.*

1413 Rookie Eligibility

A driver’s status for Rookie of the Year will be exhausted once that driver competes in a main event for the ninth (9th) time national, fifth (5th) time Western overall, regardless of how many seasons that encompasses. Competing in eight (8) national, four (4) Western main events or less will allow rookie status to be available for the following season.
Loyalty Clause - USAC may, at its discretion, award incentives by race, point standings or achievements throughout the annual racing season. These incentives are often tied to incentives the growth of the racing series and driven from various sponsorships. Incentives are often associated with loyalty to the racing series, such as attendance or digital marketing driven incentives.

A. USAC reserves the right to withdraw incentives from any car owner or driver for any length of time, due to actions detrimental to the sport or violating the loyalty clause. Negative comments, either in interviews or on social media. The incentive teams are viewed as the standard in racing and will be held to higher expectations.

B. Incentives and Points Fund will be forfeited by teams (owner and drivers) who compete in a racing event on the same day as a USAC National event is scheduled, with the same type car classification (i.e., sprint car = sprint car, midget = midget).

C. Incentives and Points Funds will be forfeited by teams (owner and driver) who compete in a racing event within 24 hours and 300 miles of a scheduled USAC National event, with the same type car classification, at a track that USAC does not have at least one National Event scheduled for the annual calendar of events.
